WORK EXPERIENCE

Trooh

May.2026 – Present

IT Intern

Toronto, ON

- Provide **Tier 1–2 technical support to 50+ users across four offices**, troubleshooting Windows, Microsoft 365, hardware, software, printers, peripherals, connectivity, and endpoint issues.
- Independently diagnose and resolve approximately **80–90% of issues** encountered at the Tier 1–2 level, escalating complex issues with complete troubleshooting information.
- Configure, deploy, reimagine, enroll, troubleshoot, and decommission laptops and end-user devices using **Microsoft Intune, TeamViewer, Atera, and manual deployment processes**.
- Own multiple **Microsoft Intune groups and approximately 10 managed applications**, supporting company-wide endpoint configuration, application deployment, security, and compliance requirements.
- Took on **Technical Support Specialist responsibilities within the NOC team** following an unexpected team departure while continuing primary IT Intern responsibilities and supporting technical incidents and day-to-day operations.
- Took a primary role in the company-wide transition from **three legacy phone systems to Dialpad**, coordinating with internal teams, leading feature demonstration meetings, supporting adoption, and serving as a Dialpad office administrator.
- Investigated **high data usage caused by repeated failed-package retries in Atera agents**, utilized Advanced logging, and worked directly with Atera Support to validate the issue and support implementation of an improved retry-control feature.
- Supported company-wide device enrollment initiatives by communicating requirements to users and remotely enrolling unmanaged devices into Intune using TeamViewer.
- Created an **Atera ticketing workflow** to track IT incidents and projects, improving visibility into outstanding issues, troubleshooting activity, and resolutions.
- Manage IT assets through physical audits, equipment tracking, and organization of the company technology storeroom.
- Create and maintain **SOPs, technical documentation, and user guides** to improve consistency and knowledge sharing.
- Coordinate with vendors and external service providers, including **Lenovo and Atera**, to investigate technical issues, escalate problems, and pursue service improvements.
- Support user onboarding, printers, AV technology, server deployment, and general workplace IT operations.

Seneca Polytechnic

Apr. 2025 – Aug. 2025

ITS Technologist (Co-op)

Toronto, ON

- Provided frontline technical support to **300+ users**, resolving **50+ incidents weekly** involving Windows, Microsoft 365, laptops, printers, networking, and workplace technology.
- Investigated, documented, resolved, and escalated technical incidents through the IT service-management process.
- Performed deployment, imaging, software installation, configuration, onboarding, hardware staging, and asset tracking.
- Managed the **Laptop Loaner Program**, preparing, imaging, tracking, and deploying devices to users.
- Used **Salesforce Lightning** for service-related activities during the co-op placement.

EDUCATION

Seneca Polytechnic

2024 - 2026

Diploma, Computer Systems Technician

Toronto, ON

High Honours | CGPA: 4.0 / 4.0 | 4x President's List Honouree

PROJECTS

- **Enterprise Networking (Academic Project):** Configured an enterprise network using Aruba switches, VLANs, OSPF, and VRRP, validating routing, connectivity, and gateway redundancy.
